

Touch Control White LED Dimmer Lamp

BS83B16-3 + HT7L4091

Characteristics

- Touch Key MCU : BS83B16-3 24-pin SSOP (8-bit Flash Type MCU)
- Built-in EPROM
- Few External Components Needed and High Stability
- Excellent S/N Ratio
- PWM Output for Dimming Control
- HT7L4091 Drives High Power White LEDs
- HT7L4091 Power Supply pin (VDD) can be Used for External Circuits

Application Areas

Touch control White LED Dimmer Lamps, LCD backlight control, products which require touch control adjustable LED illumination, etc.

Application Circuit

BS83B16 with HT7L4091 Touch Dimming LED Lighting Demo Board V0.1
